

The 2011 SANDSTONE STEAM GALA

**A New DVD and Photo CD set
from The Sandstone Heritage Trust**

Photograph: Michael Bleckmann

The Sandstone Steam Gala 2011 Twin Pack is a delightful combination set of DVD Video and Photo CD.

The 50-minute DVD tells the full story of the week-long steam extravaganza held on the Sandstone Narrow Gauge Railway in April 2011.

The CD of over 100 photographs is included as a special bonus. These superb photographs are by some of the world's most experienced railway photographers and the combination of photographic skill, hard-working locomotives and the Eastern Free State's beautiful autumn scenery will take your breath away.

Perfectly situated in the foothills of the Maluti Mountains, the two-foot narrow gauge railway is the centre-piece of the Sandstone Heritage Trust. During the Steam Gala, the railway saw no less than 22 different locomotives in steam. From the tiny industrial engines of Southern Africa's factories and farms, to mighty Garratts that would not look out of place on the standard gauge, an enormous variety of narrow gauge motive power was represented.

Vintage cars, classic military vehicles and examples of working agricultural steam also took part in the event.

The diversity of motive power, the variety of rolling stock and the train configurations that these allowed for, make this Twin Pack a must-see for anyone who loves the sights, sounds and special ambience of the great age of steam.
